

BROWSER SECOND FACTOR SECURITY SETUP

OneHealthPort now offers an enhanced security feature to improve protection of personally identified information online. You can set up your Browser Second Factor anytime or wait till you visit a site that requires it and you will be redirected to the setup page.

SETUP SEPS:

1. Login to your OneHealthPort subscriber account at:
<https://saml.onehealthport.com/TACS-AG/subscriberLogin.do>

Select the “provision browser second factor” option from the menu using the browser you wish to register for use.

2. Set your secret question choices and answers. These should be answers that only you would know and can remember.
3. Select the Cookie or Certificate option that best fits the computer you are installing it on. (Cookies are the preferred choice)

Register this Browser using a Cookie

Factor Life

- Temporarily - select this option if you normally don't use this computer and the browser second factor is to be forgotten after the browser is closed.
- Permanently - select this option if you use this computer normally and you want the second factor to be remembered for this computer.
- Permanently AND Exclusively - select this option if you use this computer normally and don't want previously registered browsers to be remembered.

NOTE if your organization's policy doesn't allow the use of cookies or cookies are deleted on a regular basis then [use a browser certificate](#).

Register this Browser using a Certificate

Factor Life

- Permanently - select this option if you use this computer normally and you want the second factor to be remembered for this computer.
- Permanently AND Exclusively - select this option if you use this computer normally and don't want previously registered browsers to be remembered.

NOTE if your organization's policy allows the use of cookies and cookies aren't deleted on a regular basis then [use a browser cookie](#).

4. Click the “submit” button and the cookie or certificate will be installed and take you to a confirmation screen that the process completed.

Note: Certificates may require administrator privileges on your PC and require extra steps to install.

WHY BROWSER SECOND FACTOR?

- ✓ For users, the extra layer of security simply means answering a few “secret questions yet it provides a much higher level of protection and security than a password alone.
- ✓ Browser Second Factor is easier than a token or something you have to carry with you.
- ✓ Provides the same security your online banking account uses for enhanced logins.
