Who's Who – Market Driven

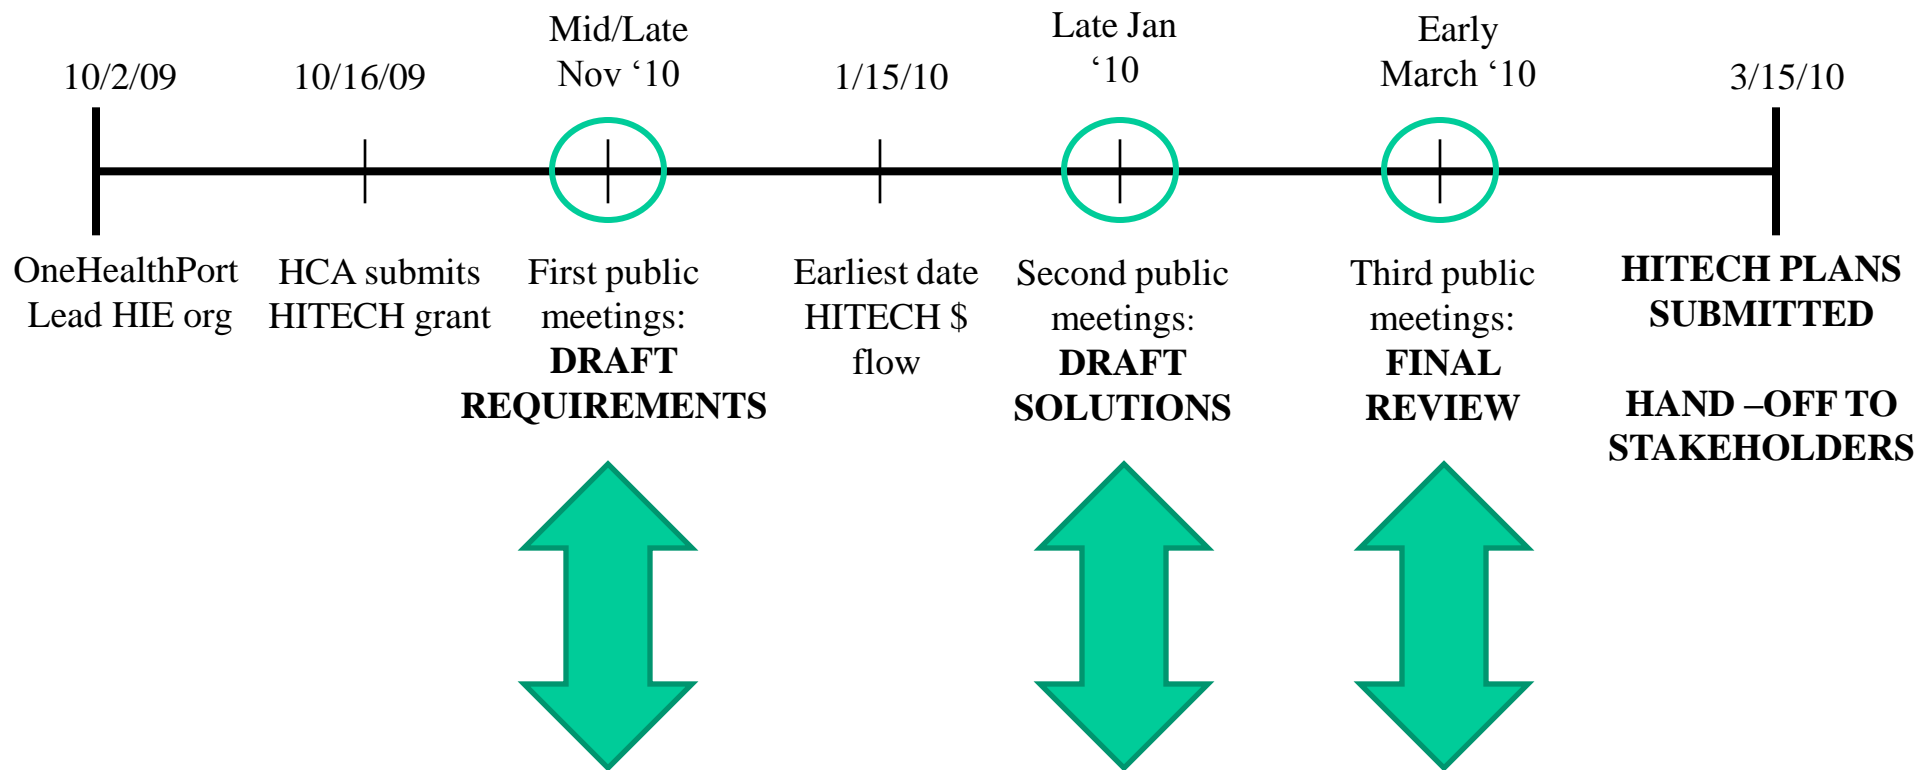

What's What – Limited Scope

- HIE discussions tend to wander and it's easy to get lost, we need a tight focus on a limited scope
- Between 10/2/09 and 3/15/10 our focus is on three cascading objectives:
 1. Design the shared elements of the health information infrastructure needed to enable HIE in Washington state
 2. Identify and establish the preferred stakeholder governance model for HIE in Washington state
 3. Complete the required Strategic and Operational Plans to secure HITECH funding
- Ideally, by 3/15/10 OneHealthPort and HCA hand over HIE leadership to new Governance structure

Focus on the Thin Layer – Shared Infrastructure

Getting the Work Done

Collaboration Center – www.onehealthport.com/HIE/index.php

Participate in meetings, participate online (at least one meeting/cycle to be web cast)

All documents shared at meetings will be available for comment online

We Want to Know What Will...
