As providers begin to treat suspected and actual COVID patients, they are trying to get paperless in the room (less contamination). As such, providers would like to not have to get the patient to sign any forms.			
<b>Can any patient signature requirements be waived for COVID patients, e.g. Medicare MOON?</b>			
<b>Follow Common Direction?</b>		<b>A paperless environment with COVID patients is endorsed and strongly supported. Payers are not aware of any group contractual requirement and believe that the only signatures needed are Consent to Treat and HIPAA Notice Receipt. For these documents, HIPAA Notice Receipt and Consent to Treat, signatures are possibly required by the provider to protect themselves – and not the payer. The HIPAA notice provided by the provider to the member is not a Payer Privacy requirement but rather a Provider obligation as the covered entity. Please let the payer know if there is a specific document on which they are requiring a patient signature.</b>
