

Is SNF care provided to COVID patients by hospitals in non-licensed beds covered and if so, how should they be billed?			
Follow Consensus Direction?		<p>Claims for services to COVID patients where the SNF level care is being delivered to patients in non-licensed/uncertified beds should be submitted with the most appropriate bed type that represents the level of care of service. Optionally, condition code DR would be reported in field 18 of the UB form. Coverage is dependent up a patient have a SNF Benefit.</p> <p>The sponsoring hospital site of service and all policies and procedures would apply.</p>
